

Sikasil® IMPROVED DUAL CARTRIDGE SYSTEM

- Unrivalled mixing quality for Sikasil® thanks to the new Sika static mixer
- 50% time saving due to double extrusion output
- Ready anywhere, mobile application

BUILDING TRUST

Sikasil® Dual Cartridge 490ml

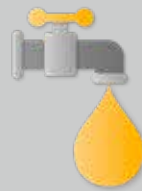

Sika introduces a new cartridge system for Sikasil®. The system is unique in the market in terms of mixing quality and dispensing performance and comes exceptionally close to a machine mix for 2-component silicones.

- Dual cartridge containing 490ml adhesive
- 10:1 mixing ratio
- Sika static mixer with 22 mixer elements
- Sika static mixer with thread for different shaped nozzles
- For use with high viscosity material such as Sikasil®
- Bigger outlets, optimized mixer interface and mixing geometry
- No cross contamination due to the specific interface design
- Compatible with commonly used dispenser

Ready anywhere

For mobile application e.g. repair and on construction site.

Double extrusion volume

in comparison to the former Sikasil® dual cartridge system.

The **special interface design** between cartridge and Sika static mixer with larger outlets and mixing geometry enables an unsurpassed cartridge mixing quality.

With thread - for different nozzles

Sika static mixer with 22 mixer elements

Bigger outlets, optimized mixer, interface and mixing geometry

Our most current General Sales Conditions shall apply. Please consult the most current local Product Data Sheet prior to use.
